MISSED APCH FIX

KENYA

The diagram illustrates the protein-protein interaction network between HENAB and DROWE. The central node is labeled (IF/IAF) DROWE. It is connected to several other nodes: (IAF) HENAB, (FAF) COLES, (IAF) FOMOP, and YATUB. The connections are labeled with their respective interaction types and strengths: 5000 NoPT (139°), 5000 NoPT (139°), 5000 NoPT (319°), and 5000 NoPT (319°). The network also includes a large cluster of nodes labeled HENAB, DROWE, and FOMOP, which are interconnected by various interactions. A scale bar indicates 30 NM to HENAB and 30 NM to FOMOP. A legend box shows the color coding for different interaction types: E 2856 (red), 229° (blue), and 7000 (green).
