|  <p>The diagram illustrates a flight path starting from the left, passing through TACAN, YINUD (ARH 0.7), and ARH 2. It then turns right at an angle of 251° to reach a crossing point marked with an 'X' at an altitude of 6400. From this point, the path continues to the right at a distance of 6.5 NM, passing through CIRVI (ARH 6) and ending at BELLA (ARH 12.5) at an altitude of 7400. A dashed line indicates a 3.03° angle and TCH 51. Horizontal distance markers show 0.2, 1.2 NM, 4.1 NM, and 6.5 NM segments.</p> |                       |       |                                                                     |  |                         |                         |                         |
